

# FASTEST WAY TO PREPARE FOR INTERVIEWS

Video link - <https://youtu.be/dSiuNYr-870>

## CHATGPT PROMPTS:

### STEP 1: INTRO

This is the job description:

[Insert job description]

This is my resume:

[Insert Resume]

I have an interview with this company. Find the common points between the job description and my previous experience.

----

Prepare a short introduction for me during the interview. Make sure it's in a conversational tone. Give it within 150 words

### STEP 2: Project/Experience based Questions

[Insert Resume]

This is my resume. Give me a list of 5 interview questions that can be asked for each section. Just give me the commonly asked technical questions.

### STEP 3: Technical Questions

I'm trying to learn - [Insert Topic]

Use the 80/20 rule to help me understand this topic. I should understand 80% of what is A/B testing with 20% of my time and effort. Make it simple.

-----

What are all the commonly asked questions in A/B testing in an interview? Give me a list of 10 questions

-----

Can you give me short answers for these questions?

-----

[Insert question]

Explain this using 80/20 rule

## STEP 4: Behavioral Questions

Give me a list of 10 commonly asked behavioral questions for Data Science interviews

-----

This is my resume:

[Insert Resume]

Using STAR method, give personalized answers for those 10 questions
